

What Can I Expect from a Dentist Providing Rembrandt One-Hour Whitening?

- The ONLY oral care program that is clinically proven to prevent loss of whitening when you brush twice daily with Rembrandt® Plus™ Toothpaste or Rembrandt Dazzling White® Toothpaste.
- Safe and effective one-hour, in-office bleaching.
- Safe and effective take-home bleaching for enhanced in-office results, or as a cost effective alternative to in-office bleaching.

Keep Your Whitening with Rembrandt Plus™ or Dazzling White®.

REMBRANDT PLUS and DAZZLING WHITE

do so much more than maintain your bright new smile. They actually continue to whiten your teeth. A recent clinical study showed that brushing twice daily with Rembrandt Plus or Dazzling White after professional whitening prevented loss of whitening.*

ASK YOUR DENTIST TODAY

You may be a perfect candidate for professional Rembrandt tooth whitening procedures and maintenance with Rembrandt Plus or Dazzling White.

*Clinical study. Results available upon request.

Whitening in
One Hour
 THE WHITEST WHITE THAT LASTS.™

Ask your dentist
 how your teeth can
 be 10 shades whiter
 in one hour.

Restore your smile to its natural luster. Rembrandt Lightning Plus Gel has been clinically proven to whiten teeth an average of 10 shades* in one hour. It is safe and formulated to prevent sensitivity.

BEFORE

Discoloration spoils an otherwise attractive smile.

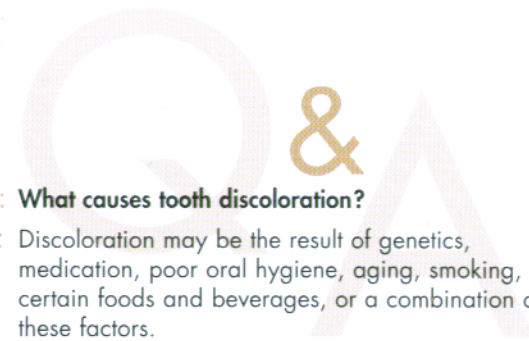

Dentistry and photography by Ross Nash, DDS.

AFTER

A whiter, healthier smile after a Rembrandt One-Hour Whitening treatment.

*Results available upon request. Based on the Bioform™ Shade Guide.

Q: What causes tooth discoloration?

A: Discoloration may be the result of genetics, medication, poor oral hygiene, aging, smoking, certain foods and beverages, or a combination of these factors.

Q: Are you a good candidate for tooth whitening?

A: People with most types of discoloration can achieve lighter teeth through the Rembrandt One-Hour Whitening Program. The type of stain you have will affect how much whitening you will experience. Ask your dentist how much whiter your teeth can be.

Q: What is Rembrandt Lightning Plus Gel?

A: Rembrandt Lightning Plus Gel is a 35% hydrogen peroxide formula. When activated by the Rembrandt Sapphire® or Rembrandt® Virtuoso® light, an average whitening of 10 shades* is achieved.

Q: Is this whitening procedure safe?

A: Absolutely! When used under the supervision of your dental professional, the procedure is safe and will not harm teeth or gums. The safety of the Rembrandt Program is supported by more than 20 research studies at leading dental universities.*

Q: What is involved in the procedure?

A: It is always performed by a dental professional, so you can be assured that the procedure is safe. They will use either the Rembrandt Virtuoso or Rembrandt Sapphire Light, in conjunction with the Rembrandt Lightning Plus Gel to achieve an average whitening of 10 shades.*

Q: Will I have to wear a mouth tray?

A: Rembrandt Lightning Plus Gel does not require the use of a mouth tray. This is a one-visit procedure that your dentist will perform. Rather than having to wear a mouth tray night after night, you will see results immediately.

Q: How do I keep my smile white and bright?

A: Daily brushing with Rembrandt® Plus™ Toothpaste is all you need to prevent loss of whitening.*

*Results available upon request. Based on the Bioform™ Shade Guide.
